## House of the future

Can you imagine what life will look like 100 years into the future? Now imagine how your house will look.

Your task is to design your own 'house of the future'.

Consider what materials you will use and whether any significant environmental conditions may influence your decisions (our world may have changed a lot in 100 years!)

Will your house need to float on water or hover off the ground, or will it be built on another planet entirely?

Maybe your house will include special features like a TV wall, a swimming pool on the roof or grass carpets?

The only limitation is **your** imagination!

Designs must be on A4 paper (hand drawn or on a computer). Closing date 05/04/19
